THE NISONGER CENTER
BROWN BAG SERIES PRESENTS:

Neurofeedback (EEG Biofeedback) for ADHD:
Challenges of testing an unconventional treatment

Please Join Us:

Wednesday, March 2nd, 2011
12:00 – 1:00
243 McCampbell Hall

About the Presenter:

Dr. "Gene" Arnold is a child psychiatrist, educator, Professor Emeritus of Psychiatry, and a Principal Investigator in the psychopharmacology and related research program at the Ohio State University Nisonger Center. His recent professional publications dealing with child mental health and ADHD can be previewed in our resources section (http://psychmed.osu.edu/resources.htm#adhdbooks).

About the session:

This presentation will describe the theory of Neurofeedback, assumed mechanism of benefit, literature review of randomized controlled trials, critique of their flaws, and unpublished results of a randomized sham-controlled pilot trial recently completed at Nisonger. This was the keynote of a symposium at the national ChADD annual meeting in Atlanta Nov. 2010.
