THE NISONGER CENTER
IDD/RESEARCH FORUM PRESENTS:

JOHN BRUNO, PHD

NEURODEVELOPMENTAL ANIMAL MODELS OF SCHIZOPHRENIA: IN SEARCH OF COGNITION ENHANCERS

Please Join Us:

Wednesday, April 10, 2013
5:15 – 6:30 PM
250 McCampbell Hall

Featured Presenter:
John Bruno, PhD, is a professor of psychology, neuroscience, and psychology at The Ohio State University. Current research focuses on the development of animal models to study the neurobiological bases of cognitive impairments in schizophrenia. Collectively, these studies are designed to provide insights into possible etiologies of these cognitive symptoms as well as to design valid preclinical screens for the development of novel, more efficacious pharmacotherapies.

Please plan to attend and be seated by 5:10 PM.
