I saw a HAT! WS Eye trackingResearch Study: Ages 12-30 yrs.

The Ohio State University will be conducting an eye-tracking study at COSI, a science museum in Columbus. The participants will wear headphones, listen to short sentences, and then click on the picture that they heard in the sentence. A short vocabulary task will follow the eye-tracking task. The KBIT-2 cognitive test may also be given (if your child has not been recently tested). The session will be about 40-45 minutes, and 25-30 minutes without KBIT-2. Each participant will receive $20 for their participation.

We are looking for WS participants who are between 12 and 30-years old.

If you are interested in your child being involved in this research study, please contact Marilee Martens (martens.22@osu.edu).
