PEDIATRIC PSYCHOPHARMACOLOGY RESEARCH PROGRAM

PURPOSE The Research Unit on Pediatric Psychopharmacology (RUPP) and Clinical Trials group conducts *research on medicines, dietary supplements, behavioral treatments, and other treatments for children and adolescents* with mental health conditions.

INVESTIGATORS We have an accomplished group of investigators. Our team includes child and adolescent psychiatrists, several psychologists, advanced (graduate) students as funds allow, one data manager, several clinical coordinators, and several student assistants and volunteers.

SERVICES Diagnosis, treatment, assessment, research training, and public education

COST **There is no charge.** Research grants, industry contracts, and donations, support clinical trials activities. There is some reimbursement available for participation.
