Dr. Fristad will describe the rationale for, and preliminary results from, a pilot trial of MF-PEP, originally designed for children with mood disorders, when provided to families of children with autism spectrum disorders.

Mary A. Fristad, PhD, ABPP, is a board-certified clinical child psychologist specialized in assessing and treating childhood mood disorders (depression and bipolar disorder). She is professor of Psychiatry, Psychology and Human Nutrition at The Ohio State University, where she has been on faculty for more than 25 years. Dr. Fristad directs Research and Psychological Services in the Division of Child and Adolescent Psychiatry. Dr. Fristad has over 150 publications, including books for families (Raising a Moody Child: How to Cope with Depression and Bipolar Disorder) and therapists (Psychotherapy for Children with Bipolar and Depressive Disorders) and accompanying workbooks for parents, children and therapists.
