INFORMATION ON QUITTING TOBACCO FOR PEOPLE WITH DISABILITIES AND THEIR CAREGIVERS

FOR CAREGIVERS:

It is a common goal to help a loved one quit smoking.
 • A person with a disability has a long history of smoking and may be more likely to be a heavy smoker.
 • A person with a disability has a long history of smoking and may be more likely to be a heavy smoker.
 • A person with a disability has a long history of smoking and may be more likely to be a heavy smoker.

Did you know?
 • People with disabilities have an average of 2.5 years longer than the general population. This is largely due to smoking.
 • People with disabilities have an average of 2.5 years longer than the general population. This is largely due to smoking.
 • People with disabilities have an average of 2.5 years longer than the general population. This is largely due to smoking.

Why is it important to quit tobacco use for patients with disabilities?
 • Approximately 70 percent of people with disabilities use to quit smoking. This is the same as people with disabilities.
 • Tobacco use is a leading cause of death for people with disabilities.
 • Smoking is a leading cause of death for people with disabilities.
 • Smoking is a leading cause of death for people with disabilities.

How do I help people with disabilities quit tobacco use?

Use the evidence-based "5 A's" strategy:
 1. **ASK** about tobacco use and readiness to quit.
 2. **ASSESS** patient's willingness to quit.
 3. **ADVISE** patient to quit.
 4. **ASSIST** patient in quitting.
 5. **ARRANGE** for follow-up contact.
